

Global Lynx

We started working with Technically Speaking in 2020. They were recommended by the CompTIA staff given their experience and knowledge in the CompTIA (and others) market space. We started working with their trainers for multiple classes, and I must say we were impressed. All their trainers are top notch, very knowledgeable, professional and responsible. Never had a problem with any of them. Melody and Tami are great and impressively responsive, agile and flexible. We taught over 20 courses using their trainers and can highly recommend their services. Manuel García US Operations Mobile: (+52) 1 55 3005-0102 www.globallynx.com
